

Company Profile

***Designing A
Sustainable Future***

Pelican Builders Sendirian Berhad is committed to "Constructing Excellence Together." Beyond merely supplying products, we partner with our clients, leveraging our technical expertise to deliver innovative, cost-effective, and environmentally sustainable solutions. Our objective is to cultivate mutually beneficial relationships with our clients, underpinned by the superior quality of our services and solutions.

CEO Statement

At Pelican Builders Sendirian Berhad, our commitment to innovation and sustainability in civil engineering drives our focus on advanced technologies and greener solutions. As a leading solution provider, we prioritize in reducing our ecological footprint and promoting sustainable development through every project.

Our collaborative approach with clients and stakeholders ensures that we deliver versatile, cost-effective, and environmentally responsible solutions. We are dedicated to building a brighter, greener future by integrating sustainable practices and cutting-edge technology into various infrastructure projects.

About Company

Established in 2019, Pelican Builders Sendirian Berhad is a CIDB Grade G4 company specializing in civil engineering technology and sustainable construction solutions. With a commitment to excellence and innovation, we have quickly established ourselves as a leader in the industry, delivering high-quality infrastructure projects that meet the evolving needs of our clients and the environment.

Our team of experienced engineers and professionals brings a wealth of knowledge and expertise to every project. We leverage state-of-the-art technologies and industry best practices to deliver solutions that are both innovative and reliable. Our technical proficiency enables us to tackle complex challenges and deliver projects that exceed client expectations.

Vision & Mission

Pelican Builders Sendirian Berhad is more than just a civil engineering company; we are a partner in building a sustainable and prosperous future. Through our dedication to innovation, sustainability, and excellence, we are paving the way for a brighter tomorrow.

■ Vision

Our vision is to be at the forefront of civil engineering, driving progress through advanced technologies and sustainable practices. We aim to create infrastructure that not only supports economic growth but also contributes to environmental preservation and community well-being.

■ Mission

Our mission is to engineer superior solutions that balance technical innovation with environmental responsibility. By integrating cutting-edge technologies and sustainable practices into our projects, we strive to minimize our ecological impact and promote sustainable development.

Our Ventures

We pride ourselves on a diverse portfolio that spans across multiple domains, including investment, trading, project management, and civil engineering services. Our integrated approach and commitment to excellence enable us to deliver exceptional value and innovative solutions across all our ventures.

Investment

Our investment division is dedicated to identifying and capitalizing on opportunities that promise robust returns and sustainable growth. We leverage our deep industry knowledge and strategic insights to invest in projects and businesses that align with our vision of creating a sustainable and prosperous future.

Project Management

Effective project management is the cornerstone of our success. Our project management team brings together seasoned professionals with extensive experience in overseeing complex projects from inception to completion.

Trading

Our trading arm focuses on sourcing and supplying high-quality materials and products that meet the stringent demands of the construction and engineering sectors. We ensure a seamless supply chain that supports our projects and contributes to the overall efficiency and success of our ventures.

Civil Engineering Services

Our civil engineering services are at the heart of what we do. We offer a comprehensive range of engineering solutions designed to address the unique challenges of modern infrastructure development.

How We Work

Our approach to business is defined by a commitment to excellence, innovation, and sustainability. Our work process is designed to ensure that we deliver exceptional value and quality in every project, leveraging our expertise and collaborative spirit to achieve outstanding results.

1 Client Engagement

We start by understanding the unique needs and goals of our clients. Through comprehensive consultations and open communication, we gather insights that guide our project planning and execution. Our client-centric approach ensures that we tailor our solutions to meet specific requirements and exceed expectations.

2 Stakeholder Collaboration

We believe in the power of collaboration. By working closely with clients, partners, suppliers, and stakeholders, we foster an environment of cooperation and mutual respect. This collaborative spirit enables us to pool resources, share expertise, and achieve common goals efficiently.

3 Eco-Friendly Solutions

We are dedicated to integrating sustainable practices into all aspects of our work. From using eco-friendly materials to implementing energy-efficient technologies, we strive to minimize our environmental impact. Our projects are designed to promote sustainability, reduce waste, and conserve resources.

Our Brands

■ Maccaferri

MacMat® HS is a high-performance geomat reinforced with Steelgrid, engineered for superior erosion control and slope stabilization. This innovative product combines the benefits of geomats with the added strength and durability of Steelgrid reinforcement, making it ideal for challenging environments. MacMat® HS effectively prevents soil erosion, enhances slope stability, and supports vegetation growth. Its robust construction ensures long-term performance and resilience, even in harsh conditions. This product is particularly suitable for applications such as slopes, embankments, riverbanks, and other areas prone to erosion, providing a reliable and durable solution for maintaining landscape integrity. In addition, supplementary device called HELLOMAC is a patented, compact, and robust device specifically designed to provide alerts in rockfall protection systems such as rockfall and debris flow barriers, simple and pinned draperies, and for geostability monitoring.

■ Infra Water

Infra Water offers advanced flood protection systems, including inflatable flood barriers and an IoT-based flood warning, forecasting, and management system. Designed for efficiency, these solutions provide reliable defense against flooding, outperforming traditional methods such as sandbags. Key products include the Infra Water Mobile Flood Barrier, which is easily deployed before or even during flooding, all through the integration of the IoT system.

■ Topcel

TOPCEL® cellulose fibre pellets are an innovative and environmentally friendly solution specifically designed to enhance the performance and durability of asphalt roads. These high-quality cellulose fibre pellets are integrated into asphalt mixtures to improve stability, reduce cracking, and extend the lifespan of road surfaces.
